PROFESSIONAL EXPERTISE

- **Hospital, Clinical, Nursing, & Home Care:** Experienced in hospital settings, providing direct nursing care under supervision, including monitoring vital signs, administering medications, and assisting with wound care. Worked closely with registered nurses and physicians to ensure the highest quality of care. Collaborated with healthcare team to develop and implement care plans.
- **Emergency, Triage, and Acute Care:** Assessed patients' conditions quickly and accurately to determine priority of care. Triage patients based on severity of condition, ensuring critical patients received immediate attention. Responded promptly and efficiently to emergencies, helping to stabilize patients and prepare them for further evaluation and treatment. Coordinated with healthcare team to ensure timely and appropriate care.
- **Leadership and Coordination:** Assists in managing care plans, coordinating with healthcare team, and supervising other CNAs. Ensured care was delivered in a timely and efficient manner. Promoted positive work environment and ensured highest quality of care. Collaborated with healthcare team to optimize patient outcomes.
- **Dementia and Alzheimer's Care:** Provided specialized care to patients with dementia and Alzheimer's disease. Managed challenging behaviors and ensured patient safety. Provided compassionate and patient care that promoted well-being of patients. Collaborated with healthcare team to develop and implement individualized care plans.
- **Hospice and Palliative Care:** Provided compassionate care and support to patients in hospice, focusing on pain management and comfort. Worked closely with patients and families to ensure physical, emotional, and spiritual needs were met. Provided dignity and comfort to patients at the end of life.
- **Home Healthcare:** Provided care to patients in their homes. Adapted to different home environments and worked closely with patients and families. Provided high-quality care that promoted independence and supported patients' comfort and well-being. Collaborated with healthcare team to optimize patient outcomes in home setting.
- **Rehabilitation Support:** Provided assistance to patients undergoing rehabilitation programs, including physical therapy, occupational therapy, and speech therapy. Collaborated with rehabilitation team to implement individualized care plans and assist patients in achieving their rehabilitation goals. Assisted patients with mobility exercises, activities of daily living, and therapeutic activities. Monitored and documented patient progress and communicated observations to rehabilitation team. Provided emotional support and encouragement to patients and their families throughout the rehabilitation process. Collaborated with healthcare team to optimize patient outcomes and facilitate successful rehabilitation.
- **Infection Prevention and Control:** Trained in infection control practices. Maintained safe environment for patients and staff. Identified and reported potential infection risks. Implemented infection control protocols to prevent the spread of infections.
