Video Production
Computer Networking
Innovation
Sales
Scenic Design
Fabrication
Project Management
Communication
Arena Rigging

Objective

I design and execute live productions at an array of events including sales meetings, product launches, concerts, broadcasts, conventions, video shoots, product activations, sporting events, and press conferences

Experience

January 2005 – March 2020

Senior Sound Engineer • Production Plus Technologies, Burr Ridge, IL

March 2020 - Present

Scenic Designer, Project Manager, Technical Director • Bleeding
Auxiliaries Entertainment, Chicago, IL

November 2021 - Present

Rigging Supervisor • Freeman, McCormick Place, Chicago, IL

I manage on-site logistics such as local crews, in-house services, meals, trucking, and housing. During pre-production, I execute a number of different tasks ranging from project management to building; I meet with clients to discuss design, logistics, and prices, design specific components of their custom-shows, and help my team of world-class technicians and engineers put it all together to create amazing memories.

In 2010, I received an ETCP Certification in Arena Rigging, and I aim to educate others to provide safe hanging entertainment experiences for all.

I have also filed several patents designed to make the entertainment industry a safer and more reliable place to work.
