Gauteng, 1911, South Africa | 0822929242

As a dedicated and proactive intern with hands-on experience in software testing and quality assurance, I have a strong technical background and a passion for ensuring the highest standards of software quality. With expertise in Java, Python, and SQL Database, I have worked with Test-Driven Development (TDD) practices and am well-versed in SDLC methodologies to deliver efficient and reliable testing solutions. I am proficient in using Selenium for automated functional testing, Robot Framework for test automation, and JMeter for performance testing, enabling effective contribution to the development and maintenance of robust applications. Additionally, I have experience with Git for version control, ensuring seamless collaboration in agile environments

Education

Vaal University of Technology

Feb 2018 - Apr 2023

National Diploma Information Technology

GPA 75

Projects

MTN Business App Academy Program

Apr 2022 - Dec 2022

The MTN Business App Academy is a program aimed at empowering aspiring app developers and entrepreneurs in South Africa by providing the skills and resources needed to build, scale, and monetize mobile applications. The academy offers hands-on training in mobile app development, UI/UX design, agile methodologies, and app deployment. Participants also gain insights into the business side of app development, including app monetization, business strategies, and product-market fit. Mentorship from industry experts and access to the MTN network provides valuable guidance for turning app ideas into successful digital products.

Work Experience

Software Tester Intern

May 2024 - Present

[Expleo](#) | Sandton

As an Intern Software Tester, I have gained hands-on experience in executing test cases, documenting defects, and collaborating with developers to ensure high-quality software delivery. I create and maintain automated test scripts using tools like Robot Framework and Selenium and perform regression testing to validate software functionality against requirements. I'm familiar with JSON for data validation and have used JMeter for performance testing. I also contribute to team collaboration by using Git for version control, managing test scripts, and coordinating with cross-functional teams. My experience has allowed me to refine my skills in test documentation, defect management, and working within agile development environments, all while focusing on delivering high-quality solutions.

Till Operator

Feb 2023 - Apr 2024

Woolworths Store | Vereeniging

As a Till Operator, I processed transactions, handled payments, greeted customers, managed the cash register, kept the checkout area organized, and assisted with restocking, ensuring smooth operations and excellent customer service.

As an Administrative Assistant, I managed a variety of administrative tasks including scheduling meetings, handling correspondence, greeting visitors, answering calls, and managing mail. I was also responsible for maintaining office supplies, coordinating events, and assisting with data entry and report preparation to ensure smooth office operations. Additionally, I supported the management of school data by creating results reports for learners using SA-SAMS (South African School Administration System and Management System).
