Interests & Future Goals

I'm passionate about acting, dance, creative writing, and all things film and television. I love storytelling that moves people—whether it's through an emotional monologue or a powerful visual scene. One of my biggest dreams is to act in a **Marvel movie** and bring a complex, dynamic character to life on the big screen. I also plan to write, direct, and produce my own original films and shows that center underrepresented voices, inspire the next generation, and prove

that you can be both the star *and* the storyteller. I'm all about bold dreams, creative freedom, and building a legacy in entertainment that's both impactful and unforgettable.
