Encouraged to inquire about letters of recommendation and personal references

OBJECTIVE

Starting my healthcare career as a certified medical assistant, I have had a foundation to build upon my skills when it comes to patient care, hands on experience, and time management. My ability to work through critical situations has given me the tools I need as a nurse, to think quickly, respond appropriately and adapt to ever changing environments. My willingness sets me aside as I will always choose to go above and beyond to meet the patients needs. By choosing to hold myself to the highest standard, I pride myself in the way I take care of and advocate for all patients I encounter.

CERTIFICATIONS
